

Discover Homework Booklet

Stargazers

Dear parents,

this booklet is designed for discover students. They will need help gathering resources and understanding tasks. There is also a sensory sheet and an explore together sheet online, you could have a look at these too as there are some activities that you might enjoy doing together. If you need any resources printed please let me know.

Archell.

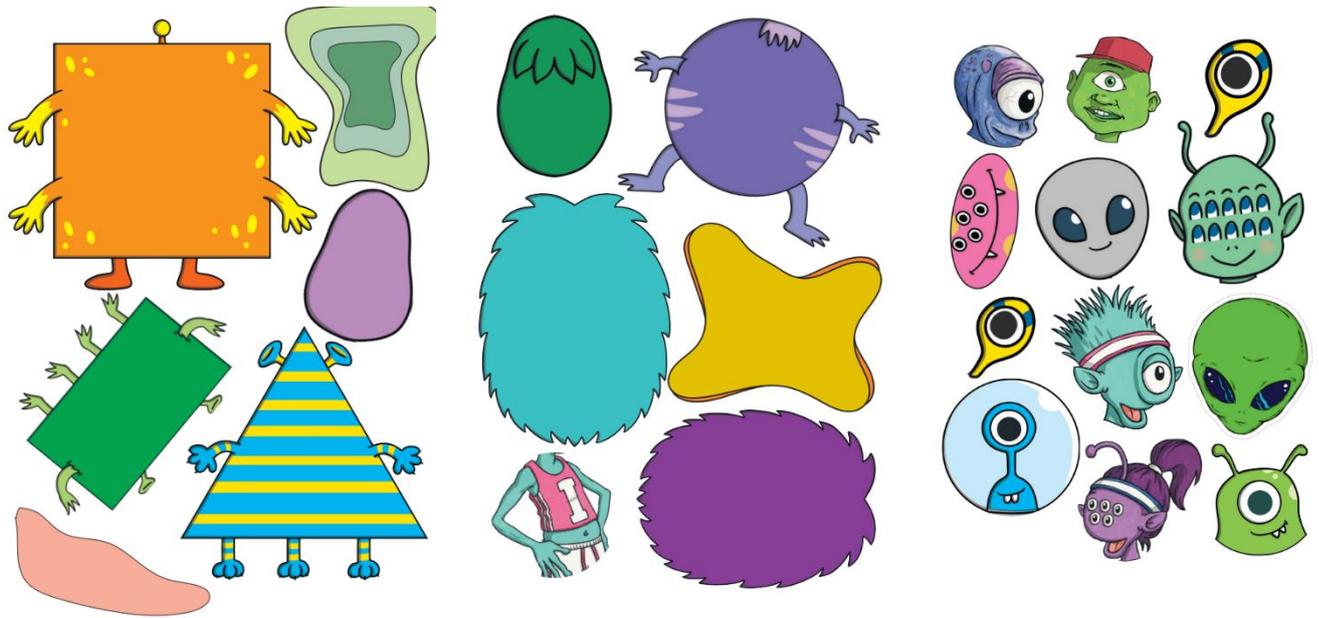

Can you find the words below in the wordsearch? You can print these out or look for the words show an adult and write them on your paper when you find them. Remember to use your best handwriting. If you are wanting a more sensory experience you could draw these in dry sand, make them from beads or play-doh or use pasta.

Moon Landing

s p a c e r w v h l y p

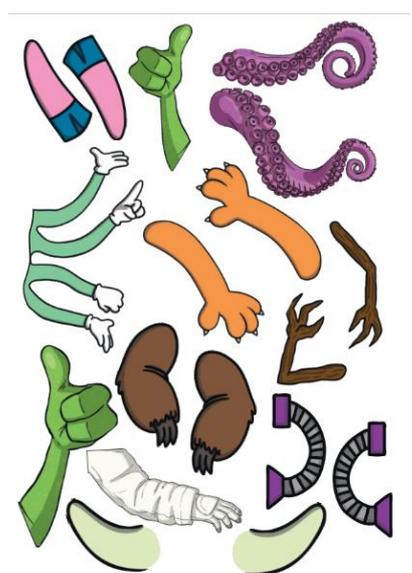

space	orbit	stars
moon	satellite	spacecraft
Armstrong	take-off	
shuttle	gravity	

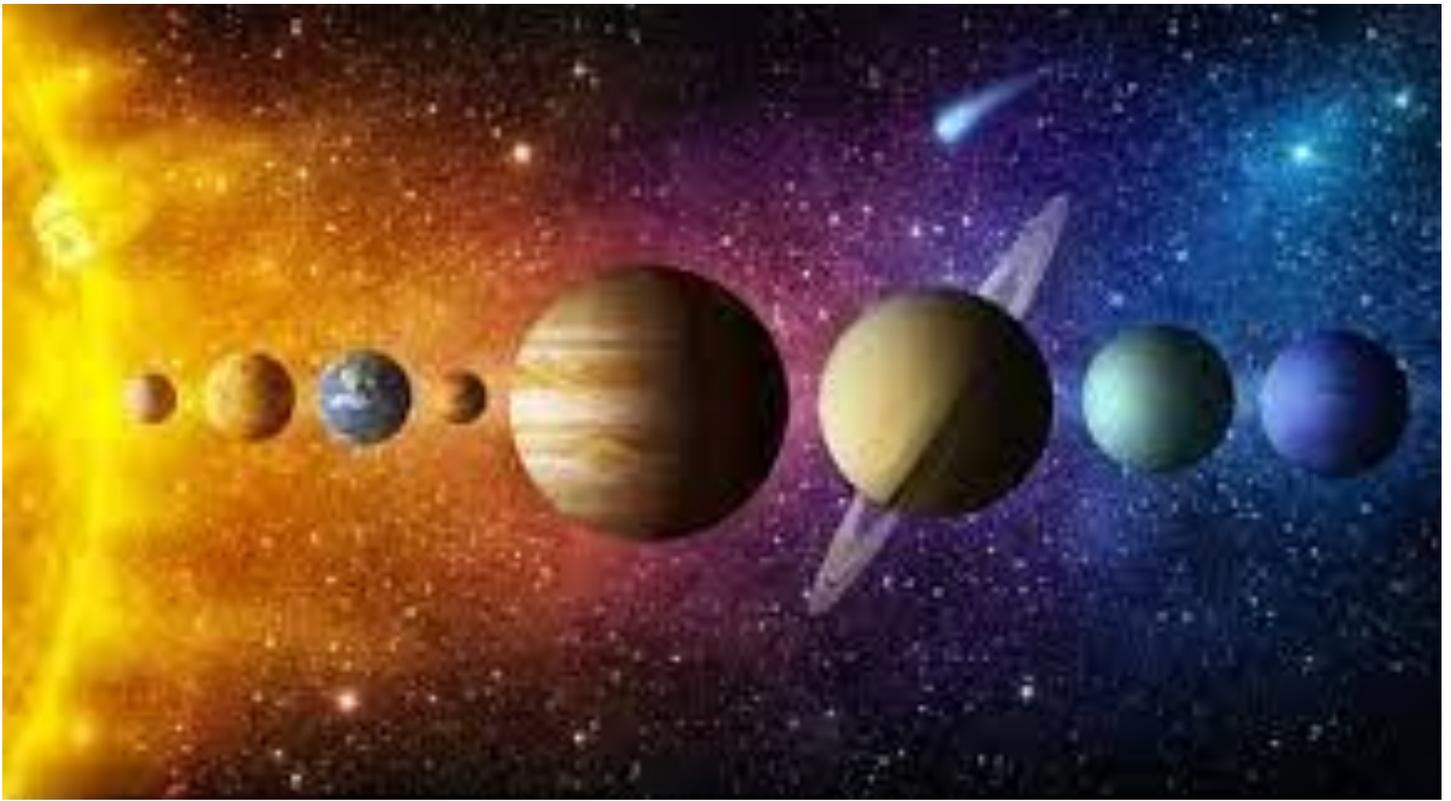

Please note: hyphens have been removed in the word search.

Make an alien from things you find around the house, from play-doh, or paint or draw it. You could make a whole family of aliens. Once you have created your alien use a voice recorder, write, comic strip or tell a story about your aliens. Think about where they live, what they look like, what their day is like. You could describe their room and house. You could make their bedroom out of an old shoebox or cereal box.

Remember this is fiction (not-real) so anything could happen.

Discuss this picture.

You could discuss the colours, try to remember the names of the planets, explain about the sun or moons. You could try and paint or draw the picture remembering to try and stick to the correct colours and sizes.

You could also check out these short films about the solar system:

<https://www.youtube.com/watch?v=Qd6nLM2QIWw>

<https://www.jpl.nasa.gov/edu/learn/video/space-place-in-a-snap-the-solar-systems-formation/>

Space Place is an interactive website created by NASA and has a lot of first-hand information.

A grid for your space-alien cartoon strip.
