

Identification of Plant Structures

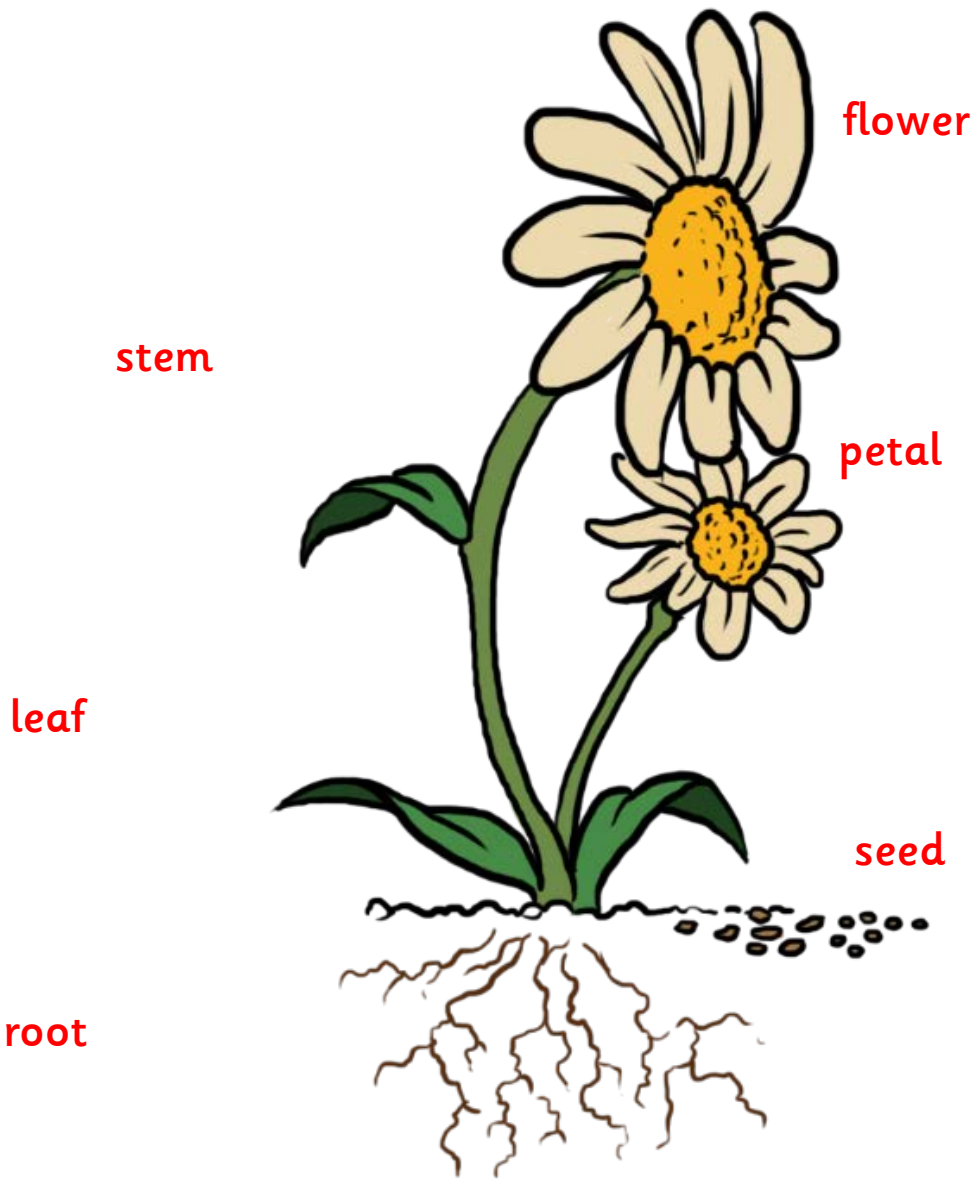

Plants and tree structures are very similar and knowing what these are can help us to look after them and keep them healthy. Below is a plant that you need to label. Use the clues to help you.

I suck up water from the ground and I give life to the plant or trees. What am I?	I am beautiful and can be seen by everyone. A bee might visit me. What am I?	I carry water to different parts of the plant. If broken the plant will die. What am I?
I live on the plant, yet I can drop off and die while the plant still lives. What am I?	I provide shade for insects and make food for the plant to grow strong. What am I?	I need to be buried but I will grown into a second plant. What am I?
