

Setting the Table

Instructions: Cut out the items to match, laminate and add Velcro for multiple use. The base boards can also be laminated with Velcro added. The student has to match the items of cutlery to the plates. If using Velcro, add the Velcro in small pieces rather than strips, to ensure the student is actually matching the correct number of knives and forks rather than just matching the cutlery to the Velcro pieces. Similarly, present more cutlery than is needed to match the plates. This activity can be used with real items and extended using spoons, cups etc.
