

Snowman Sensory Bag

You will need:

ziplock clear plastic bag

orange carrot shaped nose

shaving foam

glitter

two big black circles

sticky-back plastic or laminator

five smaller black circles

sticky tape (optional)

Instructions

1. Cut out all the templates to make the snowman's face. You may want to cover the nose with sticky-back plastic or laminate it because it's going to go in the shaving foam.
2. Stick the 2 large black circles and 5 smaller circles onto the outside of the bag, to resemble a snowman's face without the nose.
3. Sprinkle some glitter in the bottom of the bag.
4. Squirt shaving foam in the bag. How much you add is up to you, too much will make it more difficult to move the nose around!
5. Add the nose into the bag.
6. Close the top of the bag securely. You may want to use sticky tape for a leak-proof seal.
7. Children will enjoy squeezing and squashing the bag trying to get the snowman's nose in the right place.
