

All you need to create this Piggy Bank is:

1. Almost any plastic bottle is viable, and with enough creativity, anything is imaginable. A wide-mouthed drinking bottle is perfect for this cute craft.
2. Remove all the labels and cut a coin-sized rectangular hole in one side of the plastic bottle.
3. Then find four pieces of material to use for the feet — wooden balls, bottle lids or marbles work great — and glue those on the opposite side.
4. You can also choose to paint the entire bottle and legs to make it seem more pig-like, or you can leave the bottle clear to see your family's coin collection progress.
5. Using a colored paper of your choice, create two piggy ears and tape them on the same side as the coin slot.
6. You can use googly eyes or a marker to create the eyes and draw two dark.
7. circles on the bottle cap for your piggy's nose.
8. The tail is fair game; you can use pipe cleaners, paper, ribbon — you name it.
