

Monday

LI: To add to 20.

I can point to every object when counting.

I can record the answers using appropriate numerals.

See Monday's worksheets.

Addition games:

[Free Online Addition Games | Education.com](#)

Wednesday and Thursday

LI: To add to 20 using a number line.

I can use a number line to add to 20.

I can identify the first number in a number sentence,

I can count forward from that number to the right.

Watch [Learn Addition Using Number Line | Elementary Maths Concept for Kids | Addition | Part 4 - YouTube](#)

Friday

LI: To solve addition word problems.

I begin to record an addition problem in a number sentence.

I can choose my favourite technique to find an answer (using counters or a number line).

See the worksheet addition and subtraction word problems. Focus only on addition problems.

Encourage your child to choose an addition method that he is comfortable with. For instance, use buttons or pencils as counters or use the worksheet with number lines (see Friday's resources) to solve addition problems.

Discuss each word problem.

Model recording calculation using a number sentence.

Encourage your child to read the whole number sentence e.g. $4 + 3 = 7$
