

LI: To create recycling posters.

I can identify some pictures of metal, glass objects, paper and food waste products.

I can select the appropriate picture to create a recycling poster.

Discuss the recycling activity.

- Look at photos of litter around the local area - what can we do/use to stop littering?
Explain that today they will make posters to encourage everyone to recycle.
- Invite children to place pictures of different recycling objects on the appropriate recycling bin cards.
- Split class into 4 or 5 groups. Each group needs to create a different recycling poster (glass, paper, plastic, metal, food waste). Encourage pupils to write short messages on their posters or to use symbol messages.
